

Carl Zeiss Ltd Training Courses

Training courses at Carl Zeiss in Bicester are held in a well equipped training room. A computer is provided for each participant however the number of microscopes and cameras provided depends on the type of course being run.

All the tutors are fully trained on the products and have many years experience in microscopy and digital imaging. The focus of our courses is on the use of the imaging software packages together with digital cameras and microscope automation as appropriate.

The number of participants is restricted to between 4 and 8 people depending on the course.
