4 different operation modes

It provides accurate and reliable data for your daily practice routines. Intuitive handling features let you conduct the most important measurements with one device, including pupil and iris diameter evaluations. Refraction measurements of patients with implanted IOLs are also possible. Additionally, the automatic fogging incorporates an infinity scene to reduce the effects of accommodation.

A valuable addition to your practice

When taking care of patients, every minute is valuable. There is no time for dealing with complex systems. Still, you need diagnostic data that is reliable and accurate, no matter what. Especially for the very first step in vision care: the refraction/keratometric evaluation.

The ZEISS VISUREF 100. Adding more precision and reliability to your vision care – right from the start.

Benefits:

- The motorised chinrest lets you quickly and comfortably position the patient

- Tilttable 6.4 inch TFT display to show diagnostic information
- Serial interface to export/transfer data to EMR/PMS or digital phoropter
- Quick release brake to disable XY movement of the instrument base and printout

Tilttable 6.4 inch TFT display

Diagnostic information is clearly displayed in excellent contrast and resolution on the adjustable TFT monitor. Featuring a tilt range of 20°, it can be adjusted for individual user viewing preferences.
